

When Teachers and Computers Achieve the Best Combination:

A National Comparative Study of Face-to-face and Blended Teaching and Learning

Cecilia Marconi¹, Juan José Goyeneche², Cristóbal Cobo³

sLESTA, 12 de marzo de 2019 ¹

¹Data Analytics, Plan Ceibal

² Instituto de Estadística, Fac. de CC. EE. y de Adm., UDELAR

³ Center for Research, Ceibal Foundation

Definitions and
setup

Results

Conclusions

- ▶ “Plan Ceibal”: nationwide, one laptop per child
- ▶ “Ceibal en Inglés”: EFL blended program
 - ▶ videoconference + LMS + face-to-face
 - ▶ RT from Filipinas, Argentina, Uruguay, Scotland, ...
- ▶ “Segundas Lenguas”: EFL program, face-to-face
- ▶ Nationwide evaluation of both programs (adaptive online test)
- ▶ Instrument to measure engagement in the LMS

- ▶ R + RODB + RMySQL
- ▶ LMS logs
 - ▶ x_1 = num. of assignments submitted
 - ▶ x_2 = num. of files uploaded
 - ▶ x_3 = num. of comments
 - ▶ x_4 = num. of comments on submissions
 - ▶ x_5 = num. of days with comments on subm.
 - ▶ x_6 = num. of days with some activity
- ▶ Administrative info students: age, sex, socio-cultural context
- ▶ Administrative info teachers: Remote and Classroom Teachers
- ▶ Test: Vocabulary, Reading, Grammar (VRG) scores

Index of Engagement

Teachers and
Computers

Cecilia Marconi¹,
Juan José
Goyeneche²,
Cristóbal Cobo³

Definitions and
setup

Results

Conclusions

- ▶ Log or relative scale

- ▶ $\pi = \prod (1 + x_i)$

- ▶ $\pi = 1$ if all $x_i = 0$

- ▶ $\pi \rightarrow \infty$ when $x_i \rightarrow \infty$

- ▶ Re-scale and smoothing

- ▶ $IEG = (\delta + 1)/\delta \times [(\pi/(\delta + \pi)) - 1/(\delta + 1)]$

- ▶ $IEG = 0$ when $\pi = 1$

- ▶ $IEG = 1$ when $\pi \rightarrow \infty$

- ▶ δ is a smoothing parameter, set to $\delta = 90$

IEG vs teaching modality

Teachers and
Computers

Definitions and
setup

Results

Conclusions

Table: Adaptive EFL test (VRG) levels obtained by levels of IEG.

	<i>A0</i>	<i>A1-</i>	<i>A1+</i>	<i>A2-</i>	<i>A2+</i>	<i>Total</i>
$IEG = 0$	1%	32%	35%	31%	1%	100%
$0 < IEG \leq 0.3$	1%	26%	32%	41%	1%	100%
$0.3 < IEG \leq 0.8$	0%	19%	28%	50%	2%	100%
$0.8 < IEG \leq 0.985$	0%	16%	27%	54%	3%	100%
$IEG \geq 0.985$	0%	10%	23%	62%	5%	100%

IEG vs Performance Levels (2)

Figure: Blended students: estimated VRG score density by levels of IEG.

Goyeneche²,
Cristóbal Cobo³

Definitions and
setup

Results

Conclusions

- ▶ Index to measure students' engagement in LMS
- ▶ Comparison of teaching modalities: Blended and face-to-face
- ▶ IEG higher for students in blended program
- ▶ *Intra* group clustering
- ▶ Positive correlation between IEG and test score (VRG)
- ▶ Include non structured data (comments, submissions)
